Project Executable Files

This section contains all deployable ServiceNow configuration files and documentation required to review, validate, and migrate the Employee Onboarding & Offboarding solution. The project is implemented within a ServiceNow Personal Developer Instance (PDI) using Service Catalog, Flow Designer, Custom Tables, ACLs, SLA configurations, and reporting components.

Step 1: Submission Checklist

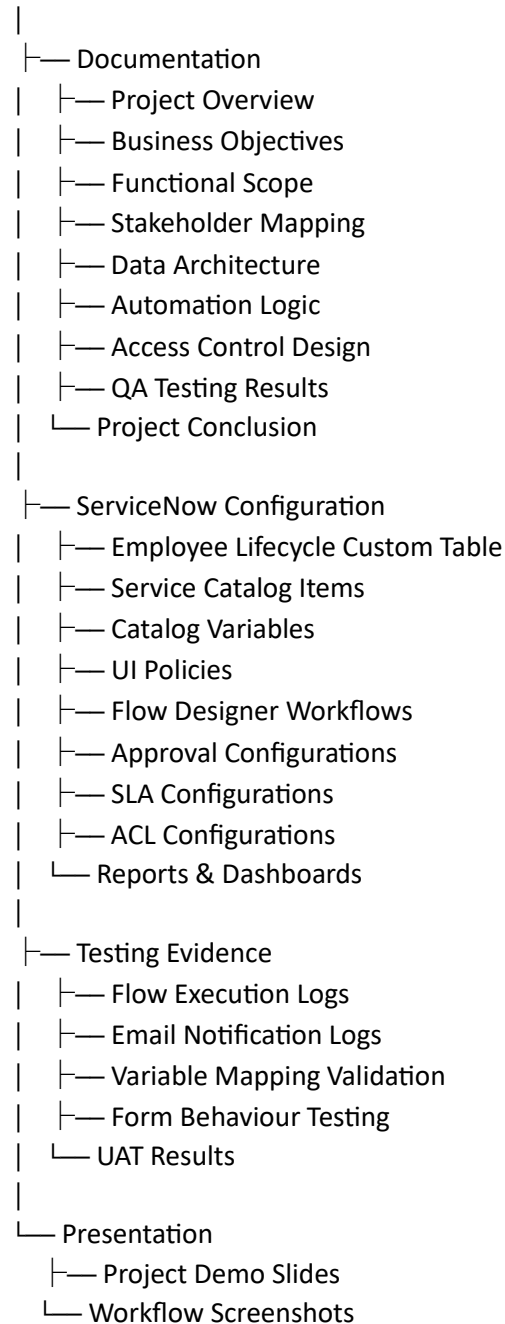

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete ServiceNow configuration (Update Set containing tables, catalog items, flows, ACLs, and configurations)	Yes
2	README / Setup Guide (ServiceNow deployment and configuration instructions)	Yes
3	Requirements.txt / package.json / dependency file	NA
4	Database schema / custom table definition (u_employee_lifecycle)	Yes
5	Environment configuration file (.env or similar) or	NA
6	Deployed application URL (ServiceNow Instance URL)	Yes
7	APK / Executable binary	NA
8	Dockerfile / Containerization configuration	NA
9	Test cases and QA validation results	Yes

10	Demo video / walkthrough presentation	Yes
----	---------------------------------------	-----

Step 2: File / Folder Structure

The project deliverables are organized as follows:

Employee_Onboarding_Offboarding_ServiceNow_Project

Step 3: Deployment / Access Details

Field	Details
-------	---------

Hosted / Deployed URL	ServiceNow Personal Developer Instance (PDI) URL
Login Credentials (Demo)	Provided separately for evaluation access
Platform / Hosting Provider	ServiceNow Platform
Repository Link	NA
Demo Video Link	Provided as part of project submission

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

1. Login to the ServiceNow Personal Developer Instance (PDI).
2. Navigate to the Service Portal by adding /sp to the instance URL.
3. Search for the Employee Onboarding & Offboarding Catalog Item.
4. Select the required request type:
 - Employee Onboarding
 - Employee Offboarding
5. Enter required details:
 - Employee ID
 - Department
 - Manager
 - Joining Date / Exit Date
 - Assets
 - Access Details
6. Submit the request.
7. Verify:
 - Request creation in Employee Lifecycle table.
 - Manager approval workflow execution.
 - Automatic task generation for HR, IT, Facilities, and Security.
 - SLA tracking.
 - Email notifications.
 - Status updates and request closure

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Integration with external HRMS and Identity Management systems is not implemented.	Future enhancement can include enterprise system integrations.
2	Integration with external HRMS and Identity Management systems is not implemented.	Use Update Sets to migrate configurations between instances.
3	Integration with external HRMS and Identity Management systems is not implemented.	Can be extended using additional Flow Designer actions and integrations.
